Green'up Access socket by Legrand	Legrand plug + Green'up Access socket by Legrand Safe, dedicated circuit, optimised charging RECOMMENDED	3 hrs
3.7 kW Green'up Premium charging station	Type 2S plug Safe, dedicated circuit, optimised charging RECOMMENDED	3 hrs
7.4 kW Green'up Premium charging station		1 hr 30
11 kW charging station		1 hr
22 kW Green'up Premium charging station		30 min

* Average charging time for a range of 100 km, based on average consumption of 12 kW/h per 100 km. Varies according to the electric car model

Which charging point at home?

2

GREEN'UP CHARGING SOLUTIONS

GREEN'UP ACCESS READY TO INSTALL KIT

SOCKET + BRACKET + RCBO

SOLUTION THAT IS **INEXPENSIVE, ADAPTABLE AND SAFE**

With the Green'up Access socket, Legrand makes it easy to charge vehicles at home. Inexpensive, simple to install, safe, they can also be used for all conventional purposes, and are specially prewired so they can easily be replaced with a mode 3 charging station.

Heavy-duty socket, identified for electric vehicles, also suitable for any application
Conforms to IEC 60884-1

8 to 16 A charging in complete safety of all electric vehicles with a mode 1 or mode 2 cable, regardless of how much charging power is required by the vehicle

Optimum safety
Surface treatment of metal contacts to improve electrical conductivity

MODE 2

Charging time

IP 55 - IK 08
16 A - 3.7 kW
single-phase

Supplied with bracket and RCBO

Line protected by RCBO

DETECTION SYSTEM PATENTED BY LEGRAND

Vehicles detect the secure Green'up infrastructure and select the maximum power that can be supplied via the socket, resulting in a shorter charging time.

WHEN I'M AT HOME,
I CAN CHARGE MY
ELECTRIC VEHICLE IN
COMPLETE SAFETY

[1] 3 hrs with Legrand coupler, 6 hrs with non-Legrand coupler
Average charge for a range of 100 km, varies according to the model.

GREEN'UP PREMIUM CHARGING STATION

SOLUTION WHICH ALLOWS CHARGING TO BE CONTROLLED LOCALLY OR REMOTELY

The Green'up Premium charging station is used for charging vehicles in mode 2 and mode 3. With its native Bluetooth connection it can be used to control charging locally via the EV CHARGE application. When connected to the IP or Wi-Fi network with the communication kit (optional), it allows remote control from a smartphone, tablet computer or PC.

Delayed start: 3, 6 or 9 hours
Option of delaying start by 3, 6 or 9 hours. For charging during the cheap rate period.

For any electric vehicle model
Green'up Access heavy-duty socket for charging in mode 2 and for all applications

Volt-free contact input
For external control of the charging station (time switch, contactor, etc)

MODE 2
MODE 3 COMMUNICATING

Charging time

Single-phase Three-phase

IP 44 - IK 08
3.7/7.4 kW/22 kW
single-phase and
three-phase

Line protected by
RCBO.
Wiring diagrams
p. 18-21

For any electric vehicle model
Shuttered T2S EV Plug socket for mode 3 charging.

“
THANKS TO THE
EV CHARGE APP, I CAN

COMPUTER, MY
SMARTPHONE
OR MY PC

MANAGING CHARGING

1 STANDARD (USING BLUETOOTH WITH EV CHARGE)

- Peak/Off-peak hours override
- Programmable daily charging and power management
- Viewing consumption of the last charge
- Software update

2 WITH COMMUNICATION KIT (OPTIONAL OR INCLUDED, DEPENDING ON THE RANGE)

- Remote control of charging
- Weekly monitoring of consumption (via Wi-Fi router or RJ 45)
- Management via the EV CHARGE app

[1] Average time for full charge according to manufacturer sources, varies according to the model

Which charging point in collective housing and private commercial sector

4

GREEN'UP CHARGING SOLUTIONS

IK10 GREEN'UP ACCESS SOCKET

SOCKET + BRACKET

RUGGED, INEXPENSIVE AND SCALABLE SOLUTION FOR EXPOSED LOCATIONS

With its IK 10 protection giving it excellent resistance to harsh environments, the Green'up Access socket is perfect for use in public car parks and lock-ups. Inexpensive, simple to install, safe, it can also be used for all conventional purposes, and is specially prewired so it can easily be replaced with a mode 3 charging station.

MODES 1 & 2

Charging time

IP 55 - IK 10
16 A - 3.7 kW
single-phase

Supplied with bracket
Available with
lockable flap

Line protected by
RCBO.

I CAN PARTIALLY
RECHARGE MY ELECTRIC
CAR IN A PUBLIC CAR
PARK WHILE HAVING
LUNCH WITH FRIENDS

[1] 3 hrs with Legrand coupler, 6 hrs with non-Legrand coupler
Average charge for a range of 100 km, varies according to the model.

GREEN'UP PREMIUM IK 10 CHARGING STATION

SOLUTION FOR COMPANY CAR PARKS

Floor standing or wall mounting, shock-resistant, the Green'up Premium IK 10 charging station is ideal for vehicle fleets. A card reader (optional) can be used to unlock the charging station by identifying the employee and keeps a tally of the electricity used via a web page.

For any electric vehicle model
Green'up Access heavy-duty socket for charging in mode 2 and for all applications

For any electric vehicle model
Shuttered T2S EV Plug socket for mode 3 charging.

Optional card reader
Unlocks the charging station and can keep a tally of the electricity used

Secure access
Charging station locked/unlocked via the EV CHARGE app

MODES 1 & 2
MODE 3 COMMUNICATING

Charging time

Single-phase Three-phase

IP 55 - IK 10
3.7 kW single-phase
to 22 kW three-phase

THREE-PHASE GREEN'UP PREMIUM IK 10 CHARGING STATION

INTEROPERABLE CHARGING STATION FOR EASE OF MANAGEMENT OCPP-COMPATIBLE CHARGING STATION

It can be controlled by a charging network operator: the Green'Up Premium charging station is easily integrated in the car park manager's billing system.

Payment for the electricity used can be added to the cost of parking in the space.

MODE 2
MODE 3 COMMUNICATING

Charging time

IP 55 - IK 10
adjustable from 11 to 22 kW
three-phase

Line protected by
RCBO.
Wiring diagrams
p. 18-21

Charging station can communicate on IP network

Compatible with existing operating systems (Modbus, OCPP)

RFID encoder reader identification system built into the charging station which can activate sockets (optional)

Space available for installing modular protection in the base

For any electric vehicle model

Green'up Access heavy-duty socket for charging in mode 2 and for all applications

For any electric vehicle model

Shuttered T2S EV Plug socket for mode 3 charging.

CHARGE 2 VEHICLES AT THE SAME TIME

One type 2S socket and one Green'up Access socket on each side of the charging station

MANAGING CHARGING

BECOMES 100% COMMUNICATING WITH THE COMMUNICATION KIT (OPTIONAL)

- Supervision and parameter setting in IP on web page
- Modbus and OCPP-compatible charging station (Open Charge Point Protocol)
- Managed with RFID reader

(1) Average time for full charge in mode 3 according to manufacturer sources, varies according to the model

Green'up Premium charging stations

Which solutions for identifying, measuring, controlling?

MANAGING WITH AN APP

Access control and control via the EV CHARGE app: monitoring charging and option of locking the charging station via the app (making it unusable by third parties who are not using the customer account), monitoring and display of consumption. Charging programmed via the app for optimised consumption management. Software update via the app.

CARD-OPERATED ACCESS CONTROL

Green'up Premium charging stations can be integrated in the building's access control system. The charging station is locked and a personal ID card is needed to dispense electricity.

Consumption measurement

One electricity meter per charging station

MODBUS
RS 485

An IP converter, electricity meter and protection devices can be integrated in the base of the charging station. For charging stations without a base, tap-off boxes can be installed nearby.

IP PROTOCOL

Green'up Premium charging station with communication kit

Web server
Used to display consumption on any type of screen equipped with a browser: PC, smartphone, tablet computer, TV, etc

+

Supervision software
For displaying measurement on a PC

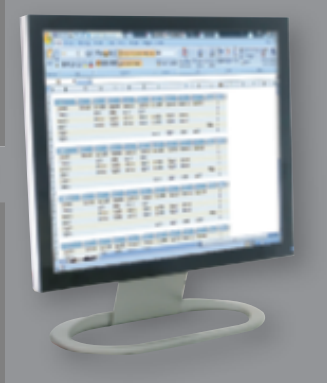

On a PC: view the charging station operating status, measure electricity consumption, optimise available energy (control charging by dividing energy between the different charging stations).

Green'up™ Premium charging stations

for electric vehicle charging

Technical characteristics and wiring diagrams **p. 18 and 19**
Dimensions **(p. 22 and 23)**

For charging all electric vehicles (equipped with single-phase and three-phase chargers) and plug-in hybrids in Mode 2 or Mode 3 in complete safety. Compliant with standards IEC 61851-1 and 61851-22.
Charging station power can be adjusted with adapted protection devices and power supply circuits. Local wireless communication via embedded Bluetooth for configuration and control of charging station via smartphone or tablet using the IOS or Android compatible app.
Available functions: changing station status, daily charging program, charging station activation/deactivation, power management, firmware updates. Application additional functions: weekly charging program, consumption monitoring with cloud storage for data, status notification. Remote wireless IP communication with communication kit Cat.No 0 590 56.
Equipped with:
- a 2P+E socket with Green'up Access safety shutter featuring the innovative Green'up system, a Legrand Group technology which activates "maximum power" mode, ensuring fast, safe charging for 2P+E plugs (Mode 2)⁽²⁾
- a 3P+N+E (T2S) Type 2 socket with blanking plates (single-phase or three-phase operation) with pilot wire (Mode 3).
Connected and protected from the electrical panel via 1 protected dedicated line (2 dedicated lines for 2-vehicle charging station).
Off-peak control option via contactor, clock and switch (volt-free contact input 12 V_~).
Remote ON/OFF control option (volt-free contact input 12 V_~).

Green'up™ Premium charging stations

equipment for wall mounting or fixing to the ground

0 590 52

Dimensions (p. 22 and 23)

Pack	Cat.Nos	Equipment for mounting charging stations on the wall or fixing to the ground
1	0 590 52	For plastic charging stations Pedestal for fixing plastic charging stations to the ground Option to integrate Plexo ³ boxes Cat.No 0 019 04/06/08(4 to 16 modules) for the protection devices
1	0 590 53	For metal charging stations Wall mounting kit with metal front cover
1	0 590 54	Pedestal for fixing metal charging stations to the ground Supplied with metal front cover Option to integrate protection devices on plates or rail chassis (dimensions equivalent to Atlantic box 600 x 400 mm)

Green'up™ Premium charging stations

communication options

Identification via RFID badge
0 590 59 + 0 590 56

0 767 11

Pack	Cat.Nos	Communication kit
1	0 590 56	For controlling functions embedded in the charging station and configuring the charging station remotely from a smartphone or PC via IP (RJ 45) or Wi-Fi Access control: for association with centralised readers Cat.No 0 767 04 or standalone readers via the Wiegand protocol IP communication For connecting the charging station to the installation's IP network and ensuring its compatibility with the following protocols: - OCPP 1.6 and 2.0 - MODBUS RS 485 (one MODBUS address per single charging station and two MODBUS addresses per double charging station)
1	0 590 59	RFID reader RFID system (identification via RFID badge, integrated RFID encoder reader) available on metal charging stations with communication kit Cat.No 0 590 56 Supplied with 1 badge to be activated Additional badges to be ordered separately ISO format Mifare Classic technology Cat.No 0 767 11/12/13
1	0 767 11	13.56 MHz badges for badge readers ISO format badges Dim. 50 x 80 mm  13.56 MHz Mifare contactless badge
1	4 149 47	Energy management multi-support web servers Allow remote configuration, test, control and visualization, via a web browser on PCs, smartphones, web viewers, tablet computers, of data collected from: protection devices (DX ³ add-on modules with integrated measurement control unit, DPX ³ and DMX ³), EMDX ³ electricity meters and multi-function measuring units, CX ³ energy management system and Green'up charging stations for electric vehicles. Direct IP connection rail mounting Power supply: 9 to 28 V = with the help of a single-phase switching mode power supply Cat.No 1 467 21 (see Legrand general catalog) to be ordered separately
1	4 149 48	For 10 Modbus addresses or 10 pulse modules
1	4 149 49	For 32 Modbus addresses or 32 pulse modules
1	4 149 49	For 255 Modbus addresses or 255 pulse modules

Green'up™ Premium charging stations with integrated DC protection

for electric vehicle charging

Technical characteristics and wiring diagrams **p. 20 and 21**
Dimensions **(p. 22 and 23)**

For charging all electric vehicles (equipped with single-phase and three-phase chargers) and plug-in hybrids in Mode 2 or Mode 3 in complete safety. Compliant with standards IEC 61851-1 and 61851-22.

Charging station power can be adjusted with adapted protection devices and power supply circuits. Local wireless communication via embedded Bluetooth for configuration and control of charging station via smartphone or tablet using the IOS or Android compatible app.

Available functions: changing station status, daily charging program, charging station activation/deactivation, power management, firmware updates. Application additional functions: weekly charging program, consumption monitoring.

Remote wireless IP communication with communication kit Cat.No 0 590 56.

Equipped with:

- a 2P+E socket with Green'up Access safety shutter featuring the innovative Green'up system, a Legrand Group technology which activates "maximum power" mode, ensuring fast, safe charging for 2P+E plugs (Mode 2)(2)

- a 3P+N+E (T2S) Type 2 socket with blanking plates (single-phase or three-phase operation) with pilot wire (Mode 3).

Integrated protection : 6 mA =

Connected and protected from the electrical panel via 1 protected dedicated line (2 dedicated lines for 2-vehicle charging station).

Off-peak control option via contactor, clock and switch (volt-free contact input 12 V_~).

Remote ON/OFF control option (volt-free contact input 12 V_~).

Pack Cat.Nos Plastic single-phase charging stations - Mode 3

IP 44 - IK 08
Wall mounting charging stations to be equipped with pedestal Cat.No 0 590 52 for fixing to the ground

1 0 580 00 **3,7/4,6 kW - 16/20 A**
For charging 1 vehicle

1 0 580 01 **7,4 kW - 32 A**
Power adjustment option:
- 3,7/4,6/5,7/7,4 kW
- 16/20/25/32 A
For charging 1 vehicle

Pack Cat.Nos Plastic single-phase charging stations - Modes 2 and 3

IP 44 - IK 08
Wall mounting charging stations to be equipped with pedestal Cat.No 0 590 52 for fixing to the ground

1 0 580 30 **3,7/4,6 kW - 16/20 A**
For charging 1 vehicle

1 0 580 35 **7,4 kW - 32 A**
Power adjustment option:
- 3,7/4,6/5,7/7,4 kW
- 16/20/25/32 A
For charging 1 vehicle

Pack Cat.Nos Metal single-phase charging stations - Modes 2 and 3

IP 55 - IK 10
Must be equipped with the following for:
- wall mounting version: a mounting kit supplied with a metal front cover Cat.No 0 590 53
- free standing version: a pedestal supplied with a metal front cover Cat.No 0 590 54

1 0 580 41 **3,7/4,6 kW - 16/20 A**
For charging 1 vehicle
1 0 580 42 For charging 2 vehicles simultaneously

Pack Cat.Nos Metal single-phase charging stations - Modes 2 and 3 (continued)

7.4 kW - 32 A
Power adjustment option:
- 3,7/4,6/5,7/7,4 kW
- 16/20/25/32 A
1 0 580 43 For charging 1 vehicle
1 0 580 44 For charging 2 vehicles simultaneously

Pack Cat.Nos Plastic three-phase charging station - Mode 3

IP 44 - IK 08
Wall mounting charging station to be equipped with pedestal Cat.No 0 590 52 for fixing to the ground

1 0 580 02 **22 kW - 32 A**
Power adjustment option:
- 11/15/18/22 kW
- 16/20/25/32 A
For charging 1 vehicle

Pack Cat.Nos Metal three-phase charging stations - Modes 2 and 3

IP 55 - IK 10
Must be equipped with the following for:
- wall mounting version: a wall mounting kit supplied with a metal front cover Cat.No 0 590 53
- free standing version: a mounting pedestal supplied with a metal front cover Cat.No 0 590 54

1 0 580 48 **22 kW - 32 A**
Power adjustment option:
- 11/15/18/22 kW
- 16/20/25/32 A
For charging 1 vehicle
1 0 580 49 For charging 2 vehicles simultaneously
